

Red LED Dolby SR.D Digital Sound Reader Unit

for Sondor OMA-S and V/OMA-S

This red LED Dolby SR.D digital soundreader is mounted on a 19"/3U panel, fitting between film-drive and spooling unit of the Sondor OMA-S Magnetic Film Recorder and the V1/OMA-S Scanner.

The precise mechanics allows easy adjustment of focus, magnification, azimuth, and lateral and vertical positioning secured with a central locking screw.

The retro-fit kit includes a separate PSU for the LED, the internal wiring and the video cable for connecting to the DA20 or CP500D.

The same unit is available as code 5412.02 for foreign film transports such as the Albrecht MB/PB51 and others.
